

PIYUSH AHUJA

Data Scientist

+91 8770696943 | piyushahuja169@gmail.com | <https://github.com/piy-12>

CAREER SUMMARY:

Results-driven Data Scientist with strong proficiency in Statistics, Machine Learning, Deep Learning, and modern Data Science tools. Skilled in transforming complex datasets into actionable insights to drive business growth and strategic decision-making. Experienced in building end-to-end data-driven solutions, from data cleaning and exploratory analysis to predictive modeling and model deployment

RELEVANT PROJECTS:

Real Estate Price Prediction | Python, Linear Regression, Flask, AWS

- Cleaned and preprocessed data to ensure high-quality inputs for model development.
- Developed a predictive model with >80% accuracy to estimate property prices, enabling data-driven pricing decisions.
- Deployed as a web application on AWS for real-time accessibility.
- Assisted businesses and clients in optimizing investments and reducing pricing risks.

Data Professional Survey Breakdown using Power BI : Power Query | Power Bi

- Designed an interactive Power BI dashboard to analyze a survey of data professionals across roles, industries, and countries.
- Cleaned and transformed raw survey data using Power Query for consistency and accuracy.
- Created dynamic visualizations with slicers, filters, and drill-through features to explore survey results.

Student Social Media Addiction Analysis using SQL and Excel

- Collected and cleaned raw student survey data to analyze social media usage patterns and sleep behavior.
- Wrote optimized SQL queries to calculate averages, identify heavy users, and segment students based on screen time vs. sleep duration.
- Built Excel reports with pivot tables, charts, and correlation analysis to visualize trends and highlight potential cases of social media addiction.

EDUCATION:

2022 – 2027 | Acropolis Institute of Technology and Research, Indore [M.P]

Integrated Master of Computer Applications (IMCA)

SKILLS:

- **ML/DL Frameworks** : Scikit-Learn, Tensorflow, Keras
 - **Analytical Tools** : Power BI, Advanced Excel, Python Libraries
 - **Web Dev and Model Deployment** : FastApi, Flask, Kafka, Docker, AWS, Redis
 - **Database**: MySQL, MongoDB
 - **Other** : NLP (Learning), Computer Vision(Learning)
-
